

- Push out standardized products; improved quality, less risk, cheaper, faster
- Subsea 2.0

Case overview

- Develop a sourcing strat. For a portion of the subsea 2.0 XT BOM
- Source 5 components
- Deliver 40, assembled in SA
- We can also make it in house so make/buy decision
- Start with the 5 points you need

Few points to include

- Summary of case facts and problem solving methodology; judges may not know case
- Not one right answer; explain to judges what priorities were, problems identified, and prove how we solved them
- Executive summary of selected strategy; at least one slide of something high level to say (this is my strat. This is what i've done)
- Youll Get excel sheet with diff types of data you need
- Implementation of strat.
- How you suggest the plan should be mobilized

Presentation

- Template provided
- Include brief take 5 moment
- No slide count min or max
- On avg 10 2 min slides

Aparna is first course of actions, then wayhan

- Looking for creativity or originality, math has to be right but really looking for the soundness of strategy and not pulling out the files to check formulas and whatnot
- Think outside the box but work within what you know; know what your'e talking about
